PROGRAM: Deborah Konchinsky, Critter Pattern Works - Why Be Creative?

Website: <http://www.critterpat.com>

Facebook: <https://facebook.com/critterpat/>

MORE INFO: Critter Pattern Works was formed in 1989 as a vehicle to help people think more creatively. We accomplish this through our machine appliqué patterns. In every pattern there is a little art lesson. We want our customers to have an open mind and discover things they can do with their sewing machines (in the bigger picture, in their lives) that they didn't dream possible.

Creativity is problem solving. We all have problems to solve. Creativity is fun. Self-discovery is fun. We accomplish creativity by asking questions. We set up a set of principles to work with and then push them to the limits. Everybody has some creativity, like everybody has height or weight or intelligence. Some people have more of an attribute than others. Creativity can be self taught.

To further embellish this block, the wings will be hand stitched where the veins are and the bodies will be lightly beaded and flowers will be felted using wool yarn for stems and fibers for petals. We will be creating the beginnings of a quilt as shown in the photo, or this block could become a pocket on a bag.
